ROLLING LOBE AIR SPRING

Delivering comfort and performance

Built to withstand the demanding conditions of commercial trucking, STEMCO® Super Cushion® Rolling Lobe Air Springs feature heavy-duty materials and construction to deliver industry-leading vibration isolation, weight savings and longevity. Designed for unrivaled comfort and performance, Super Cushion® Air Springs reduce driver fatigue, decrease component wear, lower downtime and improve safety.

FEATURES & BENEFITS

- **Superior Rubber Chemistry**
  Chemical additives infused into natural rubber walls provide exceptional ozone resistance, resulting in less flex-cracking and longer service life.

- **Reduced Weight**
  Innovative materials and design technology allow Super Cushion® Air Springs to weigh less than competitive products.

- **Bracket Dimples**
  Non-elongated design provides a more secure mounting for the air spring, increasing longevity and reducing vibration and misalignment.

- **Internal Wall Cord**
  High-strength, extra-tight cord provides exceptional wall and internal splice strength.

- **Comfort**
  Reduced driver fatigue and increased safety.

- **Equipment Longevity**
  Improved vibration isolation reduces wear and tear on truck and trailer components.

- **Fuel-Efficient**
  Super Cushion® air springs weight savings mean more miles per gallon.

Featuring a reinforced design, ultra-durable bead plates, corrosion preventative coatings and innovative rubber chemistry, STEMCO® Super Cushion® Rolling Lobe Air Springs provide the vibration isolation and durability to help your fleet reach new levels of productivity and profitability.

PRODUCT IDENTIFICATION SYSTEM
(REFER TO PAGE A4 OF CATALOG)

This convenient identification system lets you easily specify the Super Cushion® product that best meets your Air Spring needs.

**Super Cushion® Air Springs Reduce Wear and Tear On:**
- Electrical equipment and instruments
- Cab and Body
- Axles
- Transmission
- Trailer components
- Hinges
- Lights
- Rivets
